

# MICO24

## Nano

Effitronix is launching the new acquisition circuit called **MICO24 Nano**, based on IoT (*Internet of Things*) technology. Easy to install, it automatically sends all the signals to the MICO24 platform performing the analysis and the management directly to the cloud. Historical data, alarms and incidents can be checked from any PC or mobile device.

<b>MICO24 Nano MC01</b>
3 digital inputs
3 digital outputs
5 analog inputs 4-20 mA
4 analog inputs 0-10V
3 temperature sensors PT100
Control motor <u>Voltage and intensity</u> Accelerometers
Internet connection by cable and WiFi
