MICO24:
the gateway to
Industry 4.0

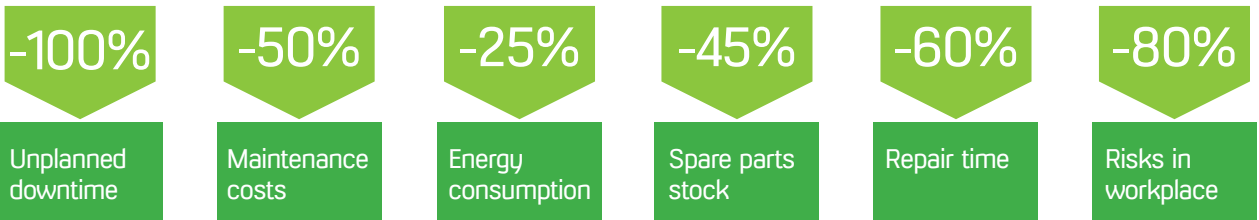

MICO24 the gateway to Industry 4.0

The first step towards industry digitalisation is installing sensors to capture relevant parameters in the production process. The use of the latest data capture technology, together with the experience and know-how of the Effitronix team, makes the MICO24 the ideal gateway to Industry 4.0. Through MICO24 one can have information of how the machines and key elements of your plant are operating at anytime, from anywhere, as well as beginning to benefit from the competitive advantages of plant digitalisation.

Benefits

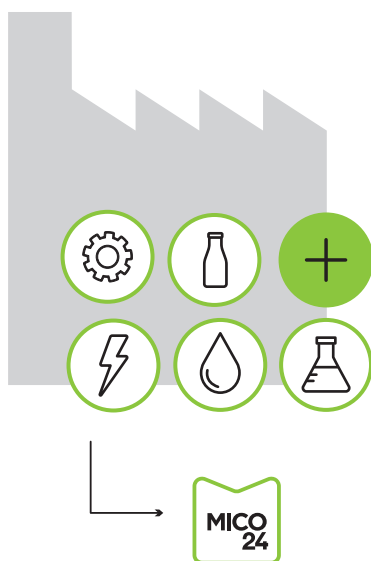

01

ROI
guaranteed

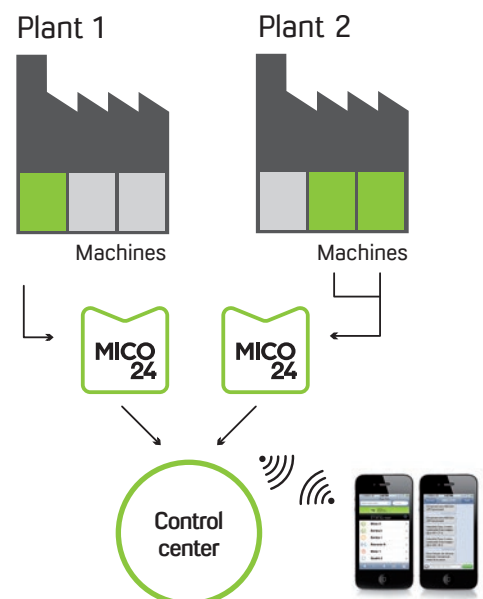

02

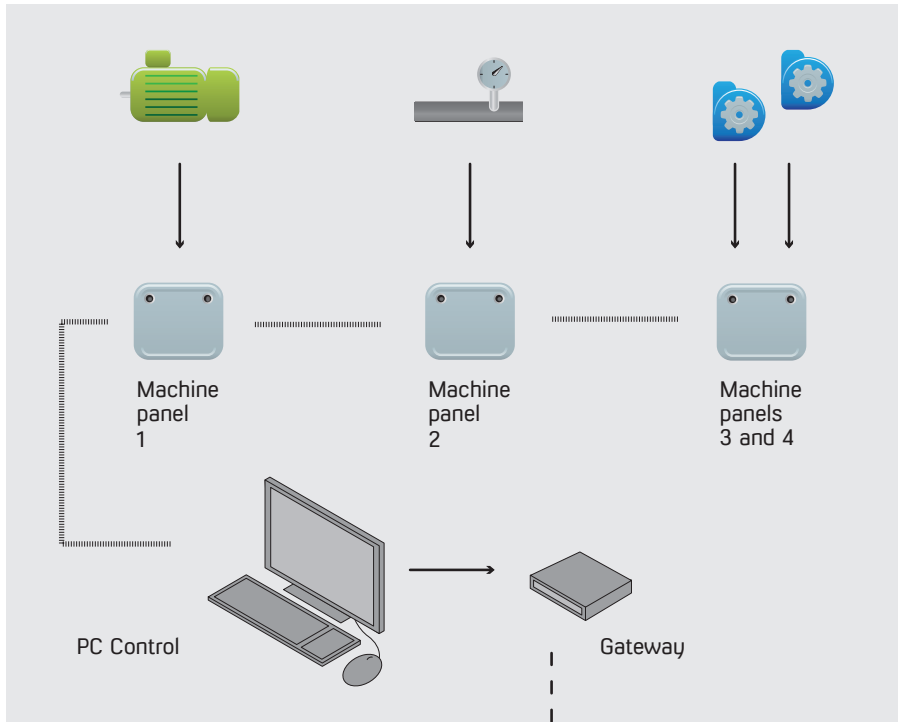

Open, modular
system

03

Centralised real-time
control

MICO24

- Unlimited control of elements and signals
- Modular scalable system
- Industrial PC
- Possibility of communicating with other networks and equipment

MICO24 Nano

- Fast and easy installation
- Small size
- Visualization, warnings and historical data directly to the cloud
